# Pacific Territories Regional Project for Sustainable Ecosystem Management

*to promote sustainable and climate-change-resilient economic development in the European Pacific overseas countries and territories (OCT)*

# 4 Components

→ Agriculture et Forestry

→ Coastal Fisheries and Aquaculture

→ Water

→ Invasive Species

AGRICULTURE  
ET FORESTERIE

**Thème 1: The agroecological transition is carried out for agriculture, including organic, adapted to climate change and respectful of biodiversity, and forest resources are managed in an integrated and sustainable manner**

## 4 Key Results

1

Sustainable agro-ecological systems are technically validated and transferred, and the obstacles to the development of organic farming are lifted

2

An integrated forest, agroforestry and coconut management policy is defined and implemented

3

Products from agroecology, forests and coconut industries are valued

4

Operational, coordination and support tools are put in place to strengthen and sustain inter-OCT / ACP cooperation

# PROTEGE

## Key Result 1

**Sustainable agroecological systems are technically validated and transferred and the obstacles to the development of organic farming are lifted.**

**Animate networks of farmers practicing ecological intensification.**

Exemple :

Co-construction of innovative solutions with farmers, technical and economic data set up, dissemination via "fields days, open farms"
